

ABLPACK

*High quality sealing aluminum
foil food container*

MADE *in* FAITH

The application of high end aluminum foil container sealing machine and sealable container

Food and beverage industry: Airline catering, fast food delivery, frozen cooked food, etc.

Baking industry: frozen dough, frozen cakes, moon cakes, western desert, flaky pastry, jam and honey.

Food industry: top grade tonic, normal temperature food, meat, fish, seafood, flavors, hot pot sauce, tea, pet food.

Electronic industry: sensor, electronic component, precision parts.

Cosmetics industry: mask, pearl powder

Commodity industry: aromatherapy candle, aromatherapy.

Other products require strict sealing.

The feature

- High-end aluminum foil sealing containers blend the advantages and technology of same type products in domestic and overseas. Beautiful, delicate and high-grade, easy to tear, it can be heated in microwave oven and oven directly, is opened then eat food, which meets fast speed life in modern city.
- The container is safe and healthy, no oxidation, good sealing, especially suitable for packaging soup. Aluminum foil has strong bacteria barrier property and can be cooked under high-temperature effectively to extend the shelf life of products, and escort for your health.
- The thickness of high end container is 1-1.5 times thicker than ordinary aluminum foil containers. Transport conveniently and won't change their shape easily.
- The capacity is from 15-3100ml, having many styles, and can do customized size, color and logo, meet the different need of customers.
- The container can be recycled, saving the energy and protecting environment!

Recycling Our Product

Top end food chain brand preferred packaging

High quality airtight sealing smooth wall colored aluminum foil food container matches with the national standard of food container, which is the mainstream selection direction in the world.

Our High quality airtight sealing (smooth wall colored) aluminum foil food container is made under high temperature sterilizing decontamination technology to make the food package more safe and reliable. It is beautiful, elegant, luxury, helping improving the level of food packaging.

It can bear high temperature and won't change its shape, can be heated on fire, steamer directly. It is oven able, microwave oven able. Keep warm effect of taking away is better, it can help fast reheating food, keep fresh taste of food, reduce the turnover process, shorten the production time of food, also can save energy, reduce the cost.

MADE *in* FAITH

Light and strong, alufoil is easily folded into a form that makes it as an ideal material for wrapping and re-wrapping many different shapes of products, while minimizes the usage of sealants. Alufoil has good malleability and easily deformed feature, but it still keeps its barrier property. So it can be used combined with other flexible packaging materials together to make ultra-thin composite material to meet different need, which can save energy again.

Fresh taste
lock the delicious!

Food grade

Pure aluminum foil material with epoxy resin lacquer, no harm, can touch food directly.

Oven able

High temperature resistant, torch can fire food directly, color won't fade.

Microwave able

It can be heated twice quickly.

Freeze able

Low temperature resistance, it can be frozen and refrigerated.

High Barrier

Aluminum foil has high barrier property, and it can keep fresh and extend the shelf life of food.

Material lightsome

Aluminum foil is light and has heat stability

Easy to clean

Although deposable, colored aluminum foil container can be cleaned and reused

Environmental protection

Aluminum foil is very malleable and easy to be deformed. It can be recycled to save resources.

Structure, working principle and advantages

Structure: the sealing machine consists of rack, cylinder or motor, and deceleration or speed governor devices, inside sealing mould and outside device and electronic inductive control system.

Working principle: after turning on the power, it begins to work. The electric heating elements heat the upper mould after getting the power, and get the temperature required through the temperature control system, and get the pressure of mold that needed through the oil-water separator or limit switch. Adjust the sealing time by Time Relay. Guide Rails micro move to realize automatic sealing.

When an aluminum foil cup is put into the down mould, pushing it to the appropriate location, the inductive switch begins to work. Upper heat mould does the sealing job automatically. When reaching the time scheduled by relay time, one time sealing is completed, mould returns automatically.

Advantages: operating simply, made from medical class steel, low failure rate, high sealing efficiency, easy maintenance, low prices and wide application, etc.

Every part and product come from mature technology parameters, long-term experience accumulation, strict quality inspection process and testing standards.

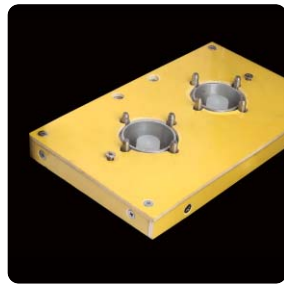

Pneumatic Series

AP025 Pneumatic type

Length	58cm
Width	32cm
Height	64cm
Applicable models	AP015B \ AP025
Voltage	220V
Sealing temperature	220-250 °C
Sealing time	0.5-2.0S

AP050D Pneumatic type

Length	58cm
Width	32cm
Height	64cm
Applicable models	AP035 \ AP050B \ AP050D
Voltage	220V
Sealing temperature	220-250 °C
Sealing time	0.5-2.0S

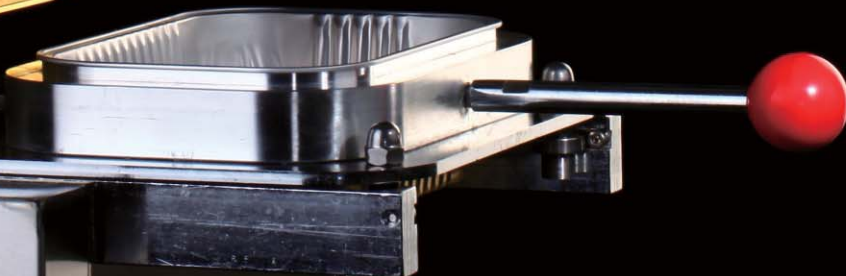

International Quality Safe and healthy

Manual, semi-automatic, fully automated machine matched with series of high-end sealed aluminum foil boxes.

It helps bakery food industry, Electronic Industry, Cosmetic Industry and other industries to upgrade innovation of E-commerce and cold chain.

The sealing machine is small size, good quantity, easily operated, economical and practical.

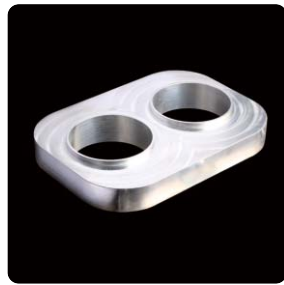

Just a small sealing machine, do sealing so easily!

Electric Series

AP125A Electric type

Length	58cm
Width	32cm
Height	64cm

Width	32cm
Height	64cm
Applicable models	AP215
Voltage	220V
Sealing temperature	220-250 °C
Sealing time	0.5-2.0S

Electric Series

AP300 Electric type

Length	58cm
Width	32cm
Height	64cm
Applicable models	AP220 \ AP300
Voltage	220V
Sealing temperature	220-250 °C
Sealing time	0.5-2.0S

AP400 Electric type

Length	58cm
Width	32cm
Height	64cm
Applicable models	AP330 \ AP400
Voltage	220V
Sealing temperature	220-250 °C
Sealing time	0.5-2.0S

Clean and healthy

Aluminum foil is completely sterilized by high temperature annealing process. Therefore, aluminum foil is safe to contact with food, and it will not breed bacteria.

Electric Series

AP450 Electric type

Length	58cm
Width	32cm
Height	64cm
Applicable models	AP320 \ AP450
Voltage	220V
Sealing temperature	220-250 °C
Sealing time	0.5-2.0S

AP620 Electric type

Length	58cm
Width	32cm
Height	64cm
Applicable models	AP620 \ AP1035
Voltage	220V
Sealing temperature	220-250 °C
Sealing time	0.5-2.0S

Manual electric sealing machine for high quality airtight sealing aluminum foil series.

New and exclusive design, beautiful and novel shape!

Small volume, excellent quality, fast sealing, good seal, economical and practical, easy to operate.

Only one second, the seal is done easily

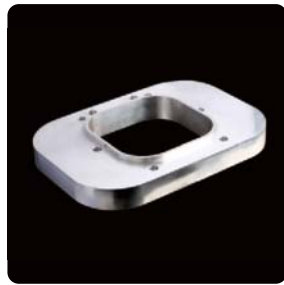

Because professional,
delicate no doubt!

Manual Series

AP300 Manual type

Length	33cm
Width	33cm
Height	46cm

ABLPACK® | **bakingpak**®

Takes **8** months to develop,
Costs **3** generational engineering model machine,
From moulding to CNC processing precisely after **8** times,
From um grade of polishing craftwork to **23** technicians
carve and grind carefully like treating an artwork.
We produce a machine just like making a cell phone, so
our **ABLPACK**® products be presented perfectly to our
clients every time.

Only need a slight press, then you will get a packed box like this aluminum food packing container, Fashion, textural impression, light and easily to carry away, No poison, no smell completely, European food grade aluminum food container, Can bear 20-250°C, from refrigerator to oven directly.

TOP PACKAGE

ABLPACK[®]

Able Responsibility Sustainable

Made in Faith · Global Sharing

Shanghai ABL Baking Pack Co., Ltd. is a professional high-end aluminum foil packaging manufacturer and professional service provider in the world. We have already cooperated with a number of global well known bakery brands to reach worldwide business cooperation, and we are regarded as the leading brand of high-end aluminum foil baking packaging.

Our company introduces a full set of advanced German technology of design and manufactory to meet global customers' customized demand and to guarantee international quality.

At the same time, through the industry layout and strategy setting, we have become one of the largest production bases and exporters of colorful aluminum foil baking package in China. With advanced automatic production lines in the world, we are able to increase the production capacity to provide more efficient and professional service to our customers.

As the high-end aluminum foil baking packaging industry leader, we believe in the supremacy of corporate reputation, bring a full range of services for customers, from harmless and pollution-free manufacturing process, the using of renewable materials for environmental protection, to the strict supervision of food safety level, so up to now we one by one achieved the safety certificates of aluminum food packaging materials, and entitled with USA FDA certificate, EU SGS certificate ISO9001 certificate and so on...

With the concept of integrity and win-win gratitude, we look forward to cooperating with you!
